

PRASHANT BAIRAGI

prashantbairagi2018@gmail.com | +91-9981100383 | [Live Portfolio](#) | [LinkedIn](#) | [GitHub](#) | [LeetCode](#)

PROFESSIONAL SUMMARY

Backend-focused engineering student with hands-on experience building and deploying Java applications using Spring Boot, REST APIs, and PostgreSQL. Comfortable working across the full backend stack — from database schema design to cloud deployment on Render and Vercel. Solid foundation in data structures, algorithms, and object-oriented programming. Seeking a backend internship (July–August 2026) to contribute to real engineering work and grow within a product or engineering team.

TECHNICAL SKILLS

Languages: Java, SQL, Python, C++

Backend Development: Spring Boot, Spring Data JPA, REST APIs, JDBC, CRUD Operations, API Design

Databases: PostgreSQL, MySQL

Cloud & Deployment: Render, Vercel, Neon PostgreSQL

Tools & Platforms: Git, GitHub, Maven, Postman, IntelliJ IDEA, VS Code

Core Concepts: OOP, Data Structures, Algorithms, Problem Solving, 120+ LeetCode Problems

Additional: Embedded Systems, PCB Design, RF Communication

PROJECTS

Portfolio Contact API — [GitHub](#) *Completed*

Production-ready backend system built using Java, Spring Boot, REST APIs, and PostgreSQL to handle portfolio contact form submissions from a live portfolio website. Backend deployed on Render, database hosted on Neon PostgreSQL, frontend integrated via Vercel.

- Developed REST API endpoints for secure contact form submission and persistent database storage.
- Tested end-to-end API workflows using Postman; integrated frontend-backend communication for real-time form handling.
- Deployed and maintained cloud-hosted backend architecture (Render + Neon PostgreSQL + Vercel).

Smart Finance Tracker — [GitHub](#) *In Progress*

Backend system using Java, Spring Boot, Spring Data JPA, REST APIs, and MySQL. Implements CRUD operations for expense tracking, categorization, and analytics.

- Designed relational database schema and implemented API endpoints for expense management and filtering.

Smart Central Locking System — [GitHub](#) *Completed*

Independently designed and deployed embedded system with ATmega328 microcontroller, RF communication (433 MHz), and actuator control. Demonstrates circuit design, embedded programming, and hardware debugging expertise.

EDUCATION

B.Tech in Electronics and Telecommunication Engineering

Jabalpur Engineering College (RGPV Bhopal) | 2023–2027 | CGPA: 6.8

CERTIFICATIONS AND ACHIEVEMENTS

- ELITE NPTEL Certification — Data Base Management System (2026)
- ELITE NPTEL Certification — Fabrication Techniques for MEMS-based Sensors (2025)
- NPTEL Certification — The Joy of Computing Using Python (2024)
- Data Structures & Algorithms — 120+ LeetCode problems solved
- Smart Internal Hackathon — Selected for college-level participation
- Independent Project Execution — End-to-end ownership from concept to deployment
- IIRS (ISRO) Certification — Remote Sensing and GIS for Environmental Studies (2021)

ADDITIONAL INFORMATION

Languages: Hindi (Native), English (Proficient)

Location: Jabalpur, Madhya Pradesh | Permanent: Shujalpur, Shajapur District

Internship Availability: July–August 2026
